

TIG (Tungsten Inert Gas) WELDING TORCH

- Arc welding with an infusible electrode and inert gas protection
- The torch cooling process through gas & water
- TIG welding is suitable for all types carbon steel, low alloy steels, Alloyed stainless, nickel alloys, aluminum and its alloys, Titanium, Magnesium and others nonferrous alloys
- As per IS 7931

Technical Specification :

Model	Gas	Length of torch with cable	Electrode	Tungsten steel rod Ø mm	Volt
WC 400 AMP , 600 AMP	Argon	4 m / 8 m	Tungsten	2.4 to 3.0	220/230
